1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claim 1, line 16, change "800800" to --800--.

The above amendment is being made to correct an obvious typographical error.

2. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art of record fails to disclose or teach the recited pressure pad having a thermal conductivity of at least about 800 BTU-in/hr-ft²-degreeF (115 W/m-K) and a density of at least about 0.3 lb/in³ (8g/cm³). As pointed out in the specification on page 8, lines 7-14, forming the pressure pad from a material having the recited properties has been found to have advantageous properties such as good thermal conductivity sufficient to closely couple the temperature of the refrigerant in the valve with the charge temperature to achieve good sensitivity of the valve to the refrigerant, and lack of susceptibility to hunting as compared with other thermal expansion valves.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
